Three Killed On Railway Crossing Near Red Deer

Railroad crossing accidents continue to demand headline space in the daily newspapers. The latest such fatality occurred Sunday morning last at 3:30 o'clock on a crossing three miles north of Red Deer, when three members of a North-bank, (near St. Paul) Alberta family were killed by a C.P.R. south-bound passenger train. The dead are John Ferrence, 59, and his wife, 59, and Mary Ferrence, 19, their daughter-in-law who were riding in the rear seat of the fatal sedan car. The latter's husband, Jack Ferrence, 28, and his brother Sam, 21, are in the Red Deer hospital, the former, the driver of the car, in a serious condition.

Both train and automobile were travelling south and according to the engineer of the train, which was travelling between 60 and 70 miles per hour at the time, there are trees on either side of the crossing. For some distance the road and railway run parallel, but then the road turns east and west to make the crossing. At the time of this accident a violent thunderstorm was raging.

LOCAL & GENERAL

Don't forget the horseshoe tournament Fair Day.

Don't forget to see the ball game Fair night at 6 p.m. on the local diamond—Olds vs. Didsbury.

Mr. John Eubank motored to Banff over the week end with two chums from Edmonton.

Mr. and Mrs. Ben Dick and two sons Earl and Donald, of Edmonton, spent Wednesday and Thursday at Allen Hunsperger's after spending a week's holiday at Banff.

While in town on Fair Day make it a point to drop in the Pioneer Office to pay your subscription if it is overdue. They are payable in advance.

The tourist, presumably an American, who has been passing worthless Confederate States of America notes in Calgary, dropped one in Didsbury Saturday morning. Yee Bo was the unlucky merchant who took it in payment for trade.

Council Authorizes Cement Sidewalks

That section set apart for the use of pedestrians from the Club Cafe west past the Pioneer Office will soon boast a cement sidewalk!

Harry Gabel who is in charge of the job is laying a 6-foot strip from the cafe down to the west side of Pioneer Office. A wider piece is also being laid in front of the Bank of Montreal premises and Teskey's garage on Railway avenue, a decided improvement.

It is hoped that the Council may see fit next year to extend the former strip west to the end of the block and possibly lay another strip from the Hotel corner west to the telephone office. Such permanent improvements not only enhance the value of the property but this particular street is the coming business section of the town.

Sixth Fortnightly Dept. Crop Report

Cutting of wheat will start early next week and will be fairly general a week later in a number of districts in the province, according to telegraphic reports received Friday last by the Department of Agriculture for the sixth crop report of the season. Winter wheat cutting is well under way in the south part of the province and a very satisfactory yield is reported. A good crop of spring wheat is also ripening and will yield as high as 30 bushels per acre in some southern districts.

As the result of continued dry weather and hot winds during the past two weeks the prospective yield, particularly throughout the central part of the province, has suffered a further reduction. The wheat crop especially has been affected and much of the grain is so short in the straw that it cannot be harvested satisfactorily by the ordinary methods. The Department of Agriculture, however, is demonstrating at a number of points in this area a binder attachment which will make it possible to save practically all of this short grain, and many farmers are adopting this system with very satisfactory results. An explanation in detail of this method will be found on another page in this issue of the Pioneer.

Local Successful Gr. 8 Students

A complete list of successful Didsbury students who in June 1929 wrote the Grade 8 examinations set by the Department of Education, follows below. The successful students are now qualified for entrance to high schools.

L. Berscht, A. Brusco, Gladys Carlson, Art Chamberlin, Hazel Coates, Ruth Gabel, Sidney Hall, Reta Heiber, Murray Kendrick, Vera Lowrie, Lucille Madoche, Jessie McCoy, Bernice McGillier, Louie Newton, Willie Neufeld, Maitland Perrin, Grace Ranton, Herb Sinclair, Lyla Wriggleworth.

All Roads Lead To Didsbury, August 14

The 26th annual Didsbury Fair will be held Wednesday, August 14th, when, in addition to the regular livestock and grain show, the horticultural exhibits, fancy work and domestic science exhibits, there will be horse races, a country baseball tournament and foot races for young and old.

This event is a valuable feature for the strengthening of the livestock and agricultural products especially in this district. Every citizen in town and every farmer in the district in doing his or her share will help to make Didsbury's big yearly event a success. This is one of the main assets to the district and all can lend a hand.

In addition to the sports as advertised on the posters, the sports committee have arranged for an exhibition of horse jumping.

In the evening an exhibition game of baseball will be played on the local diamond, our neighboring town to the north, Olds, being the visitors. In the league these two teams were very evenly matched each team winning two games out of four played against each other.

Short Strawed Crops Present Difficulties

The short-strawed crop found at many points in the province this year has brought many farmers face to face with the problem of how best to save the crop they have. They are anxious to save what feed they can and also to secure every possible bushel of grain and that without undue expenditure for equipment, which may be of little use in average seasons.

As a result of this condition active steps are being taken by the Dept. of Agriculture to meet the situation, and the following announcement will be of great interest to farmers who are faced with this problem.

The ordinary grain binder is but poorly adapted to the harvesting of such crop. Some of the cut grain is lost in elevating and more by the time it passes the packers; sheaves are poorly bound or not bound at all with the result that much of the grain is lost in handling. To overcome the drawbacks of the binder for harvesting such grain, the header has been invented and is now used extensively in some districts, but since the present conditions are not likely to be soon repeated, the purchase of headers would not be justified. It is possible, however, to make certain changes in the binder at low expense that will enable it to do similar work to that done by the header. Such changes are outlined below:

First remove the sheaf carrier and binder parts and the idle roller. An extension elevator is then added to the ordinary elevator, so that instead of using only one elevator canvas three are employed. The front and rear sides of the extension are built similar to the original elevator. The drive is from the upper rollers of the extended elevator. This drive is secured by bolting to the upper front end of the extended elevator another gear assembly like the one on the upper front of the short elevator. The two gear assemblies are connected by a square rod with a universal joint at each end. It will be found necessary in the upper gear assembly to key

Ides Wedding Day

Cornelius Vanderbilt, Jr., millionaire newspaperman, and his wife celebrated the first anniversary of their wedding at the Banff Springs Hotel recently. Mr. Vanderbilt is combining his attachment to newspaper writing and motoring by writing a series of articles on automobilism in Canada. He and his wife are motoring through western Canada and he is most enthusiastic about the roads, scenery and accommodation in the Canadian Rockies which he knows well through frequent visits.

Didsbury Show Team In Runaway At Olds Fair Last Week

During the afternoon of the Olds Fair Wednesday last, an accident of a somewhat serious and costly nature marred the day's proceedings when Mr. E. Knott, Didsbury, who was showing a team of drivers, came to grief when pleasure racing around the track with Mr. Stewart of Bowden, also driving a show team. The mix-up occurred near the merry-go-round, at which Knott's team shied, resulting in the driver being thrown heavily to the ground. The team then started its mad race around the track, halting only when colliding with a car, turning it over on its side in a general mix-up. Mr. Knott was taken to the hospital badly bruised, everything being damaged but the team.

WEDDINGS

GEIGER—HERRON

Mr. Melvin Geiger and Miss Ada Irene Alberta Herron were united in the sacred bonds of matrimony by Rev. A. Traub at the minister's home, Didsbury, July 24th, 1929. After the ceremony the happy couple motored to Calgary and thence to Banff on a short honeymoon, returning to Didsbury to renew acquaintances and friends.

Mr. and Mrs. Geiger will reside at Galahad, Alta., where the bridegroom is pastor of the Mennonite Church.

Miss Aleda Huget who has been attending summer school in Edmonton returned to her home last week.

Miss Vera Wittwer and Mr. J. Witt called at Allen Hunsperger's on Friday afternoon, returning the same evening.

Mr. Elmer Evans who has been attending Camp Tuxis at Kasota Beach, Sylvan Lake, and the Boys' Work Board of Alberta camp at Morely, returned home on Thursday.

On account of Wednesday being Fair Day the Pioneer will go to press earlier than usual early Wednesday morning. We would esteem it a favor if the advertisers would prepare their copy earlier than usual. Those who have news items will please co-operate also.

What Is a Good Government?

Hon. R. D. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"Is it not time that we had a government that would look after the interests of Canadians and Canadians only? You say that is a selfish policy. Ah, my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partizan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyze and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, but a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result,—continual warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smash-up of Confederation.

Suppose, for example, that rightly, or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the results?

All government is a matter of compromises. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities and provinces. But if selfishness is to be the measure of a good government, then insistence by each group, or community, or province, upon its own views and policies means that any and all compromise will be impossible, and government itself must fall.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British Governments to adopt policies of selfishness, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain selfishly entered the war against Germany in defence of the rights and integrity of Belgium. Following the war Britain waived all debts owing to her by other allied countries, save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being exemplified at almost every meeting of the League of Nations. That League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier Mackenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, and prohibit any opposition parties from functioning? That's selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

Suggests Powerful Signals For Vessels

Sea Should Be Better Illuminated
Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the great improvements made in modern electric lighting. He states that in this modern age of illumination the sea is the only part of the globe which is plunged into obscurity at nightfall, and recommends that ships should employ powerful signals like the headlights of motor cars. Undoubt-

edly the weakness of ships' lighting is a contributory cause to many collisions that occur at night, and the fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea.)

Holstein Bull Goes East

Prize Winner From Strathmore Purchased By Quebec Interests

The Raymondale Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm in Strathmore. This young bull, Strathmore de Winton Matchless, was junior champion last year at Calgary, Edmonton and Saskatoon, although defeated at other shows by his herd mate Strathmore McKinley Fairchild Wayne.

Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals sharing the house with the horses. There are 100 horses in the stable and with them, living contentedly, are two Indian monkeys, a wild hare, a vixen, pigeons, rabbits, canaries and foreign birds.

No Unemployment Problem In Iceland

Country Offers Great Opportunities
Through Undeveloped Land

Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployed of Reykjavik totalled eight men on May 1. Six of them were more than 60 years old and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 900,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

LIFE WAS A BURDEN

Health Restored Through the
Use Of Dr. Williams' Pink
Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Dowling, Tottenham, Ont., and further says: "I was so badly run down that I felt that life was a burden. The doctor said my trouble was due to poor blood, but his medicine did not help me. My face was sallow, my lips bloodless and at the least exertion my heart would palpitate so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was in a decline. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on taking them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To sum up I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail post paid, on receipt of price, 50c. Try them today.

Moose Jaw Tourist Camp

Additional facilities are being provided at Moose Jaw Auto Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Farm Planning

Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plans for his house and barns, and the lay-out of his farm.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Waiter: What's de matter with dat egg, boss?

Diner: It was served too late to be good egg and too soon to be good chicken.

Canadian Teachers' Federation

1930 Convention Will Be Held At
Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee and the adoption of a number of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, New Westminster, B.C.; A. J. Powell, Ford, Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Heard, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittaur, Montreal, Que.; H. C. Ricker, West St. John, N.B.; J. A. D. Good, Truro, N.S.; and C. B. Jelly, Summerside, P.E.I.

New 'Plane Is Climber

British Machine Reaches Four Mile
Height In Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet.

The plane is a single-seater equipped with a super-charger and specially-geared Jaguar motor developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 185 miles an hour.

The plane is intended to take off from a home defense aerodrome and to climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

Developing Trade

Increased Travel To the West Indies
Follows Inception Of New Service

Since the inception of the new service between Canada and the British West Indies, by the R.M.S. Lady Nelson, in December last, the Canadian National steamships' boats have been practically booked to capacity on every sailing. Traffic from Canada to the West Indies has developed tremendously since the inception of the new Canadian National liners, and there has also been an increase of travel from the West Indies into Canada particularly in the summer time when attractive rates give the West Indies business man an opportunity of going to Canada to study the markets there.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Very Considerate

"I just had a 'phone call from Skippy. He's the most considerate boy I ever knew."

"What did he have to say?"

"He wanted to know if I got home all right from the dance he took me to last night."

Keep Minard's Liniment in the Medicine Chest.

Denied Entrance To States

Young Toronto Inventor Claims He
Has More Powerful Substitute
For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 197 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name in Europe being Jacob Starselski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustapha Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patents on his discovery. He declares he had made arrangements with Frank J. Kinnzinger, attorney, of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

It isn't the girl who fires up quickly that makes the best match.

**Are You
Ready**

**When your
Children Cry
for It**

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

**Fletcher's
CASTORIA**

Dandruff

Rub Minard's into your scalp
four times a week. Prevents
falling hair.

Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future practicalities in Sir Henry Thornton of the Canadian National Railways, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay uncompleted, eroding, its roadbed sunk so deep in places that the rails jutted forth like steel tentacles. Men have fought blizzards, loneliness, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry see pinned to the northland when that golden spike is driven?

"I believe there may be a time when great hotels will rear themselves at Fort Churchill, the terminus, to accommodate the tourists who have sailed up the eastern coast, along the fringe of Labrador and through Hudson Strait; then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at last to disembark and proceed home with the every comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway. "A railroad," says Sir Henry, "is never finished." It has to grow with the development it starts. Who dare predict the scope of the development that will gather wings to put to flight the little sweep that already has proved the northland to be a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will not be denied their railroad accommodation. The terminus of next month will become the junction of many lines. "A railroad is never finished."

"The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; smelters are rising, water-power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a road-builder as Sir Henry Thornton says is never finished. — Manitoba Free Press.

Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat, said Dr. Gershaw, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Canmore, Regina and Moose Jaw with Medicine Hat.

"I suppose you will soon be married, Giles?"
"Not just yet. Marie's pig is not fat enough yet." — Lustige Sachse, Leipzig.

W. N. U. 1795

Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

"While much is said in regard to the rapid development of Canadian industries, very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis and under full control of the growers themselves," says an article in the "Vancouver Sun" of June 13, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

British Columbia Bulbs

Sent To England To Be Planted In Old Country Parks

British Columbia bulbs, believed to be the equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Tolmie, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulbs might be exported to Britain to be planted, and labelled, in the public parks.

Cuba's most ancient city, Baracoa, is to be improved and embellished after hundreds of years of neglect.

Criticizes History Books

Says Canada's Part In The Great War Passed Over Lightly In Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 words devoted to the part Canada played in the Great War," stated Dr. J. L. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Native Sons of Canada, in the course of an address before the eighth annual convention of that organization at Winnipeg.

"Such a condition of affairs in the education of our children is a colossal shame and national disgrace," he declared. The text books were published in the United States and edited in the United States by Americans, said Dr. McDougall. Educational authorities, when asked for an explanation, had replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle Show and Sale, good average prices were paid for bulls, thirty-eight head of Shorthorn bulls averaging \$170. Fifteen head of Shorthorn females averaged \$111, four Aberdeen Angus bulls averaged \$175, three Hereford bulls averaged \$188, and an aged Holstein bull sold for \$110. Quite a number of bulls, including both the champion Aberdeen Angus and the champion Hereford were bought by Saskatchewan Live Stock Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed.

British Columbia Tobacco

The B.C. Provincial Government has secured fifty pounds of white burley tobacco grown in the Vernon district and will blend it with the Sumas product. The mixture is to be placed on the market to test the commercial suitability of British Columbia tobacco.

National Research Council Will Endeavor To Solve Many Economic Problems

Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Kinds Of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture, it was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand. "Our experiments this year confirm the earlier prospects," said Dr. Grisdale. "No names have yet been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind now that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discovered by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

Has Faith In Alberta's Gas Fields

Engineer From Buffalo Predicts Province On Eve Of Great Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He states that he is convinced that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

Lavas rarely flow as much as a mile an hour.

Waste gas from Alberta's oil fields, loss from fermentation and other problems of the Canadian honey industry and "the iodine content, and control of iodized salts in Canada," will be investigated by the National Research Council. Decisions to undertake this new work, in addition to the 100 or more other problems now under investigation, were made at a council meeting here.

All parties actively engaged in seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October. Dr. Chas. Camsell, deputy minister and other representatives from the Dominion Department of Mines; Dr. G. S. Whitby, professor of chemistry at McGill University; representatives of the University of Alberta, who have given considerable study to the situation and Dr. H. M. Tory, chairman of the National Council, will be included in the personnel.

Work on honey has already been started in co-operation with the Dominion Department of Agriculture at the request of the industry and will be further advanced by an associate committee appointed at the meeting.

Iodine in salt was brought to the attention of the council by the Canadian Chemical Association, and the Canadian Medical Association, the declaration of the former being that "it is not yet certain that the indiscriminate use of iodized salt is entirely beneficial to public health. Sums aggregating \$25,000 were granted at the meeting to aid research projects in Canadian universities. The largest sum went to Professor T. Thorvaldson, of the University of Saskatchewan, who for six years, has conducted an exhaustive study of the effects of alkali water on cement and concrete. A grant was made to Professor E. F. Burton, of the University of Toronto, for the purpose of developing his new method of determining moisture content of wheat, wood and other products. A grant of \$2,500 was made to Professor E. H. Boomer, of the University of Alberta, that he might continue his work on the economical utilization of natural gas. Color vision, generation of electricity, using the windmill as prime mover, internal parasites of sheep, swine and poultry, design of steel columns and struts for buildings and bridges, blood pressure reactions and the spectra of helium were included in the researches aided.

Origin Of The Word "Humbug"

Few people who use the word "humbug" so glibly, realize that it is a corruption of the name of a well-known German port. But years ago, when wars were common on the continent, so many false reports came from Hamburg that people used to say sceptically, "That is Hamburg!" So "Hamburg" became corrupted into "humbug."

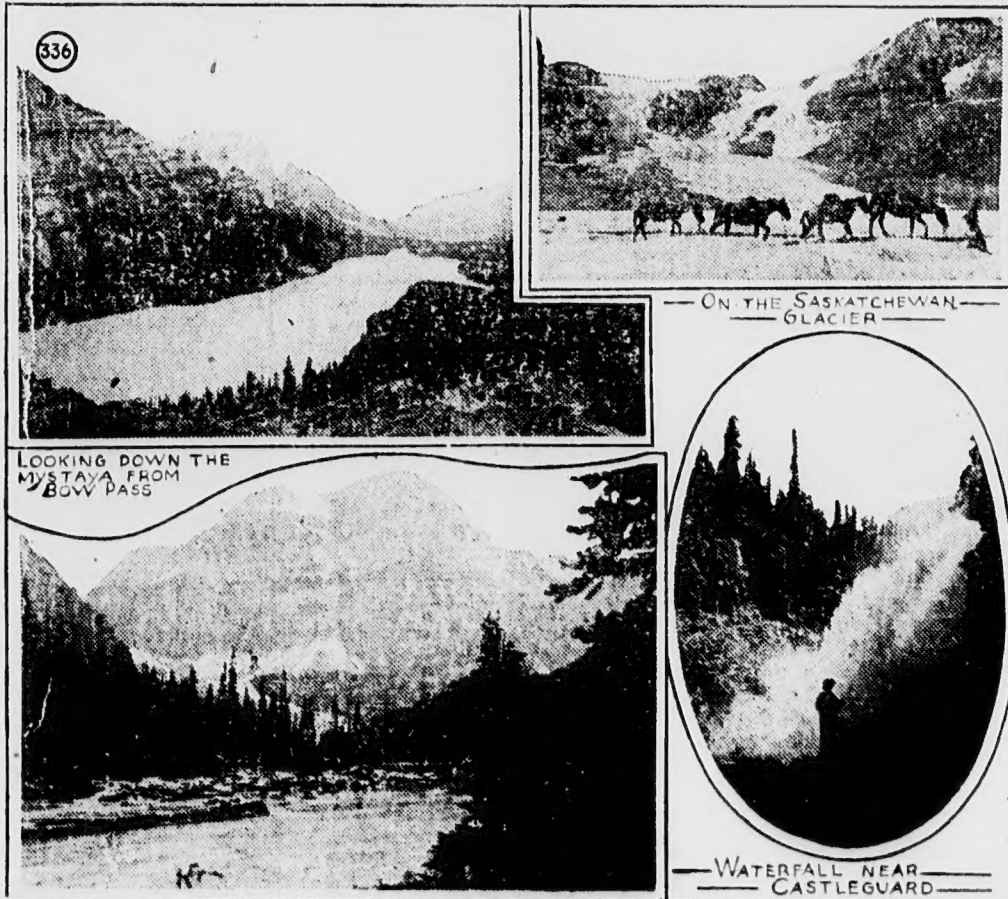

Growing Use Of Water Power

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 10.7 per cent. and that the total development now amounts to 5554 installed turbine horse-power per 1,000 of population.

"What has happened?"
"The cat scratched me."
"But what about all those wounds on your head?"
"Oh, first of all she threw the soup tureen at me." — Esquella, Barcelona.

Riding on the Roof of the Rockies

SHADOW LAKE UNDER THE SHADOW OF MT. BALL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and lasting 18 days, to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Bow Lake, over Bow Pass

and by the Mistaya Valley past Watertown Lakes to the North Saskatchewan River, then up the Alexandra River Valley to Castleguard and the Columbia Icefields. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders,

or those who cannot spare the time, there will be a four-day ride starting from Banff August 1, and ending at Castle Mountain Bungalow Camp. It will take in the Egypt Lake district, which will be accessible for the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful Shadow Lake under Mount Ball will be the camp site of the riders on the second day out and, in all, seven glacier-fed lakes will be on the route of the trail.

BOORS ALL

A reasoning being can usually find answers to his own questions, but there is one that stumps all. Why is it that motorists forget all etiquette and the rudiments of courtesy when they get behind a steering wheel?

It is not polite to swear at the dining table if the butter isn't passed the instant it is asked for. And almost everybody employs the polite "Pardon me" in pedestrian jams and crowded elevators. But get the same people in the driver's seat and there is loud honking and a cussword or two if the car ahead stops too suddenly or fails to start soon enough.

Seldom does one meet a driver on the open highway who will give an inch to the other fellow and surrender his right-of-way to convenience other cars. It is everybody for himself and curses upon the other fellow even though his faults and transgressions are your own.

Motorists spurt around corners without regard for the safety and hearts of others; cars cross and halt suddenly in front of others without giving warning, and, instead of taking accidents calmly and assuming one's fair share of the blame, drivers and passengers strive to see which can out-yell and out-cuss the other. Why is politeness left behind or forgotten by most drivers the minute they step into their car?

Once an individual expert in the art of cussing was said to "swear like a trooper." "He swears like a traffic policeman" or "he swears like a motorist in a traffic jam" are similes in common usage. Did the motorist get his education from the traffic officer, or the traffic officer get his from the motorist?

HAVE YOU PASSED

On Saturday night the High School examination reports began to arrive, and the students have been watching each incoming mail with trepidation. No one who has gone through the ordeal of opening the fateful envelopes or the newspaper containing reports, will ever forget it. A trip to the dentist with an aching tooth, or the first plunge into cold water, have some elements of the sensation, but not so acute. Sheer panic descends upon the victim. He holds the paper in trembling fingers, knowing that the judgment on a year of work lies therein. From a comfortable feeling of optimism he sinks suddenly to a conviction that he could not possibly have made it. Has he passed on one solitary subject? There is nothing to do but find out. So he opens the envelope. One by one he checks his marks. Relief, surprise, disappointment wait him in those potent figures. And his next sensation is one of jubilation or woe according to the markings.

So much happens upon this yearly record! Whether or not he will return to school. Whether he will be received with warmth by approving friends, or be scowled upon for a failure. Whether he will be able to go on to new adventures, or be burdened all holidays with exams to be written in the fall.

The waiting for exam results is a black cloud over holiday time for young people. Their elders are past this stage, and are liberal in giving advice and reproof.

But examinations for older people might be reasonable too. Just what

LOCAL & GENERAL

Miss Nellie Wilson was a visitor to Okotoks the forepart of the week.

Mr. C. E. Reiber was a business visitor to Calgary on Monday.

Miss Anna Bricker of Calgary is the guest of Miss Laura Smith this week.

Mrs. Dr. Evans and sons Ellwood, Elmer and Howard were Sunday visitors at Sylvan Lake.

Mr. H. O. Tonjum was a business visitor to Herbert, Sask., this week.

Mr. and Mrs. A. Brusso and son left by motor Sunday on holiday bent to Vancouver.

The W.C.T.U. will serve dinner and lunches as usual at their booth on the Fair grounds on Fair Day, August 14th. 32-1

Messrs. Bert Fisher, Bill McFarquhar, Alf Allen and Ed. Allen, the latter of Calgary, spent Sunday at Sylvan Lake.

Mr. and Mrs. Ranton motored to Cooking Lake on Tuesday. Mr. Ranton returned home this morning.

Wednesday, August 14th, Fair Day. All stores will be closed at 1 p.m. and will remain closed for the balance of the day.

Mrs. Geo. Smith, Mrs. Alden, Miss Lucille Smith and Miss Betty Melnis of Calgary are holidaying at Sylvan Lake this week.

A role tailored to John Gilbert's dashing talents, His ardent love-making "The Mask of the Devil," at the movies, Saturday, August 10, 7:30 and 9:30.

WHAT OTHER EDITORS ARE SAYING**SHOULD HAVE MORE PUBLIC OPERATION**

The Advocate has its serious doubts as to the absorption of so many town utilities, and the institution of so many town utilities, by the Calgary Power Co. Not alone has it purchased a number of electric light plants, as well as supplying "juice" wholesale as at Red Deer, but it is also dealing in regard to water service plants as at Camrose, Wetaskiwin, Lacombe, and other towns, and it may tackle sewer systems.

Ontario, a province one hundred years older, has its municipalities and government in control of electric light and power, water services, sewer services, street railways, etc., all except the telephones, which came in from the States.

The Advocate had not much sympathy with the sale of the Alberta northern railways to the transcontinental roads, but that may have some defence in order to tie them up with the transcontinental roads. Now that the province is relieved of 25 millions of railway liability, it could well afford to buy out the Calgary Power Co., and assist the municipalities in establishing and maintaining their utilities. The district hospital system, under public control, has been a good thing for the province, bar one or two mistakes. The gospel of public control and public operation is bound to grow increasingly, even if we do not see so much of it in our generation because of the increasingly established private institutions, and because of the multitude of trade control private corporations in retail and wholesale trade, in manufacture, and in banking. The co-operative and pool systems work out a great measure of public control in the productive field, but there is room for a lot more of public control and operation in the distribution and service field.—Red Deer Advocate.

TALLAHASSEE, Fla., July 18.—The state banking department announced that the State Bank of Bowling Green, Florida, had failed to open its doors today, bringing to sixteen the number of bank failures in the state during the past two days.

"Thank goodness we are living in a land where a stable banking system is known and appreciated."

would be the verdict on our year's labors?

Have we ourselves earned a pass in industry, accomplishments, honorable action, fairmindedness and brotherly kindness?

Mr. Harold Reiber of Edmonton is holidaying in town this week.

Mr. Lorne Frey left by motor for a visit to his home at Alsea-k.

Mrs. Eva Hopkins of Los Angeles is visiting with her mother, Mrs. A. Sexsmith.

Miss Isabel Milligan of Calgary is visiting with Mrs. J. A. McGhee for a few days this week.

Mr. Goldie Liesemer left on Tuesday for Pittsburg, Penn., where he has accepted a position.

Mr. and Mrs. J. Fookes and family returned home over the week end from a motor trip to points in southern Alberta.

Mr. A. R. Kendrick motored to Sylvan Lake on Saturday to spend the week end with his wife and family.

Miss Bessie Clemens who has been visiting with her sister at Kimberley, B.C., returned to Didsbury last week.

Mrs. Briggs who has been visiting her sister, Mrs. Ivan Weber, left for her home in Moose Jaw on Sunday.

Mr. A. A. Reeves will be principal of the Didsbury High School for the coming term. Mr. Reeves was a few years ago principal of the Innisfail High School.

At the annual convention of the Red Deer U.F.A. Federal Constituency Convention held in Red Deer on July 25, Messrs. G. A. Burns and W. H. Davies were elected as directors.

After August 1, 1929, the government grain inspectors will not grade envelope samples. At least two pounds of grain will have to be submitted before a grade will be given on a sample.

According to the latest issue of the Alberta Gazette Mrs. Mary Rodney has been granted exclusive use of the name "Rodney Ridge Farm" as the name of her home on SE 1-4 6-32-2.

Jack Sutherland, Turner Valley, appeared before Magistrate G. C. Pettie, Olds, Monday, charged with failing to give a fellow driver half the road. He was fined \$10 and costs and his driver's license suspended.

Special Fair Day Pictures at the Opera House, Aug. 14. Feature picture — Karl Dane and Geo. K. Arthur in "All at Sea" — they're sailors now! Thrilling moments in stirring events in ring history—knockouts in slow motion—Sharky, Dempsey, Tunney, Heiney, etc. Shows 6:30 to 9:30. Big dance following. Olds' Elks' Orchestra.

Mrs. J. W. Phillipson and family returned from a holiday trip on Sunday last after a trip which took in Prince Rupert, Vancouver, Victoria, Chilliwack and Kamloops, reports a very fine holiday. While in Vancouver a picnic for old Didsburyites was staged. Amongst those present, numbering 48 in all, were Albert Howe and family, J. M. Reed and family, N. Weicker and family, A. Bosenberry, Mrs. Williams, Misses Pearl Rupp, P. McNaughton, Viola Kiteley, Alex. Hendry and family, Stanley Hardy and family, Mr. and Mrs. George Hunt.

Banff Athletic Centre of Canada

Typical Highland dancers and piper grouped on platform outside the Banff Springs Hotel.

Finish of 100 yds. race showing track and grandstand where the Dominion championships meet will be held Labor Day next.

All eyes will be turned to Banff next Labor Day for on that date the 40th annual Dominion track and field championships meet will be held at the beautiful resort in the Rockies. A fast 20-foot quarter mile race track, built up and surfaced like a tennis court will be ready for the meet, the infield is being specially prepared and resown and the grandstand enlarged.

The Banff Highland Gathering and Scottish Music Festival will precede and coincide with the championships and it is expected that many of the athletes will be present during the gathering in order to accustom themselves to the new surroundings in which they will compete. Highland pipers and dancers from all parts of Canada will be present at this assembly giving a Scottish flavor to the national championships this year.

ROD AND GUN

A large variety of stories and articles of outdoor life, fishing and hunting, well illustrated, combine to make a very attractive publication of the August issue of the national outdoor life magazine, Rod and Gun and Canadian Silver Fox News.

Among the favorite contributors having splendid features in this issue of the magazine are John Richmond, Bonnycastle Dale, J. W. Winslow, G. F. Sladen, W. C. Motley, C. S. Landis, J. R. Matern and F. C. Ness. Their various articles cover the outdoor field

ITEMS OF INTEREST

Under a recent arrangement between Provincial and Dominion Governments, the Poultry Promotion Service of the latter is being withdrawn from the province and the policies of the two governments will be continued in the future under the supervision of the Alberta Department of Agriculture. The Alberta Government has also secured the services of Ivan C. Cunningham who has been associated with Mr. Cornie in his former work and he will join the staff of the Provincial Poultry Branch. An extensive program of research work along poultry lines will be undertaken by J. H. Hare who has been poultry commissioner and who under the new arrangement will also take over the work of directing the provincial poultry plant at Oliver where this work will be carried on. The Department will work in close co-operation with the various poultry organizations. It is recognized that poultry raising is rapidly becoming an important branch of the farming industry and it is the desire of the Department to give every possible assistance and encouragement to this important activity.

A very artistic pamphlet has just been published by the Federal Government on the development and recreational possibilities of the Dominion. This profusely illustrated little booklet entitled "Canada's Natural Resources," is a most useful guide to the natural wealth of the provinces, and may be obtained for the asking from the Natural Resources Intelligence Service, Dept. of the Interior, Ottawa.

Church Announcements

EVANGELICAL NOTES

Rev. H. E. and Mrs. Roppel and daughter Hope, who have been away attending the funeral of the former's mother at Port Elgin, Ont., expect to be back in Didsbury about Aug. 7th.
Members and friends of the Ev. Church please note that all church services will be resumed next Sunday, August 11th in the regular order with the Pastor in charge.

CHURCH OF ENGLAND

Church services second Sunday of each month, 11 a.m., Communion service, Rev. H. Clay in charge.
Every fourth Sunday, evening service at 7:30.

M.B.C. CHURCH

Rev. C. J. Hallman, Pastor.

Divine services will be resumed on Sunday, as follows:
Westcott 10:30 a.m. English.
Didsbury 2:30 p.m. German.

very thoroughly in interesting and informative style, particularly in angling and target and game shooting. The magnificent cover design by the well known artist, Major Allen Brooks, is itself worthy of special mention. Up to date developments in the silver fox industry are dealt with in the regular fox section.

RUGBY NOTES

The August meeting of the Rugby W.L. was held at the school, with seventeen members and three visitors present. Arrangements were made for the sewing course to be held this month at the school. Mrs. O. O. Swingle was appointed delegate to the constituency conference at Carstairs, Sept. 4th. In conjunction with the Westcott W.L. our flower and vegetable contest will be held at Rugby on Aug. 22.
Mrs. C. Young gave us a full report of the Provincial convention. Miss Brubacher presented an interesting report on the League of Nations. The meeting closed with the singing of the National Anthem after which lunch was served. The September meeting will be held at the home of Mrs. Shannan.

Teacher: "Mary, why doesn't the lamb follow you to school nowadays?"
Mary: "What, at fifty miles an hour?"

WORLD HAPPENINGS BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending marks questions have been concluded and an agreement has been signed.

The first loans issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Peking's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Aaron Sapiro, famous co-operative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent. membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic despatch recently. Mr. Sapiro's voice broke down during a recent tour of the West.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

The Friend Of All Sufferers. Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

Minard's Liniment for Earache.

Rubber jewelry is the latest fad. We wonder if wedding rings will carry a no-blowout guarantee.

A Severe Attack of Dysentery Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use

On this day his bowels had moved twenty-three times in eleven hours, but four doses checked it.

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours.

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Japan Favors Canadian Wheat

Wheat From Dominion Has Supplanted U.S. Product In Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tutchiro Shoda, president of the Nishin Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centres of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver. Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

Most of the bacon eaten in Britain is imported from Denmark.

No jumpy feeling NOW when I drive through traffic

Nothing relieves tension so effectively as Wrigley's. The act of chewing, as motorists have discovered, has a gentle soothing effect. The healthful cleansing action of Wrigley's refreshes the mouth and steadies the nerves.

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canners as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

Fresh Supplies In Demand.—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape bottles and can be carried without fear of breaking.

More than half the arable land in Japan is in rice.

Minard's Liniment for Neuralgia.

Michigan has by far the greatest coast line of any state.

Awarded Scholarship

Chemistry Instructor At Saskatchewan University Receives High Honor

Norman S. Grace, instructor in chemistry at the University of Saskatchewan, has been awarded the Belt scholarship to the University of London, Eng., where he will continue his studies in chemistry. This award is considered a high honor as there are only three of these scholarships for the British Empire, and they have not often been given to Canadian students.

The winner is the son of Mrs. E. R. Grace, 1034 Aird Street.

S. A. H. Grace, who recently won first class honors in physiology at Oxford where he holds a Rhodes scholarship, is a brother, as is also Nathaniel H. Grace, who has frequently appeared in University honors lists.

Information On Water Power

Government Has Data Concerning Water Power Throughout the Dominion

The comprehensive system of compiling all available data concerning water power resources and development throughout the Dominion instituted by the Dominion Water Power and Reclamation Service, of the Department of the Interior, many years ago, and maintained with constantly increasing efficiency and thoroughness, places exceptionally complete information on this great natural resource at the disposal of the public. This compilation at one central source, for areas under either Dominion or provincial administration, the latter by collaboration with the provincial governments, enables an exceptionally complete review of the resources of any watershed or other area in the Dominion.

Minard's Liniment for Rheumatism.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$150,000 for the seed cleaning plant and warehouse at Moose Jaw.

A woman first sheds a few tears—and then proceeds to open the telegram.

A spool of thread was unknown 125 years ago.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. Milton McMullen, Vanessa, Ontario.

Record Of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at \$239,500, as compared with \$139,200 for the previous week, and with \$264,750 for the corresponding week of last year. From January 1, 1928, fire losses totalled \$11,135,950, and from January 1, 1929, to July 10, 1929, they were \$12,976,250.

The course of true love never runs smooth, and in later years the bachelor is often glad of it.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

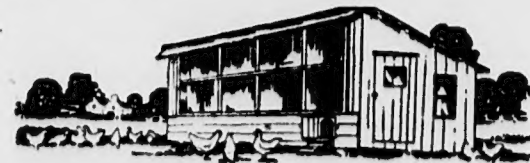

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, heads a party of four that visits Blackie Joe's night club in downtown New York. Al Stone, Blackie's chief comedian and singing waiter, begs Molly, the ballad singer, to render a love song he has just written for her. Molly is disdainful and refuses even to read the song. Al is in love with her but she tells him harshly that she will never marry a waiter. Then she leaves her dressing room and goes to the Marcus table, trying to ingratiate herself with the famous producer. Al is in despair, Grace, the cigarette girl, who loves Al and wants to see him happy, asks him what is the matter.

CHAPTER V.

"Nothing's the matter, kid," said Al, making a show of throwing off his depression. But his wan smile belied his words.

Grace gazed hopefully up into his face. Her expression said plainly that if he would only confide in her she was sure she could help him.

Slowly he studied her young, sensitive features. She was an awfully sweet kid, undoubtedly, and he liked her, but—

At that moment someone else arrived to interrupt his thoughts. Blackie, all excitement, entered the corridor, calling out:

"Get ready Al—you're on next!"

Al turned lack-lustre eyes toward Blackie. Then, suddenly, a plan that had been forming vaguely in his mind ever since Molly's harsh exit, took definite shape. He drew himself up and said quietly:

"Blackie, I'm quitting tonight."

Blackie retreated a step as if he had been struck, while a little cry of amazement escaped Grace. Her hand went to her mouth in a quick gesture of apprehension. Blackie was the first to recover himself.

"Don't be a fool, Al," he said earnestly, putting a hand on his singing waiter's shoulder. "You've got a good job here and a following among the customers. You can't quit off-hand like this—why, it wouldn't be fair to me or to yourself."

Al nodded slowly. Yes, he had thought of that. But there were other things to be considered.

"You won't miss me," he suggested. "You've got lots of talent. And I simply couldn't sing a comic song tonight—it's impossible the way I feel. And Blackie—I don't want to be a waiter any more. I want to write. The waiter racket will never get me anywhere—I know it!"

Al's vehemence increased as the words poured from his mouth. He saw his way clearly now—he would leave this place and never see Molly again. That was the only way to solve his problem. Suddenly his sense of reserve was lifted from him; he determined to give Blackie his complete reason.

"The only reason I've hung on here," he exclaimed passionately, "was to be near her! She's turned me down and—it hurts. She's the only person in the world I want, and without her . . . Well, you can see now why I can't stay."

His voice trailed off at his concluding words and his shoulders sagged hopelessly. Blackie nodded. Again his hand rested comfortably on Al's shoulder. He could see how vitally this affected his prize singing waiter—why, the boy's whole world had been turned upside down?

"Molly—eh?"

Al's head came up at the mention of the beloved name. He nodded.

"I wrote her a song—a love song. I poured my heart into it because it was for her. I wanted her to sing it, so she'd know how I felt toward her, but do you know what she did? She wouldn't even look at it; she laughed . . . I found the song-sheet here on the floor where she had walked on it."

Al glanced down at his hand, which still held the crumpled ballad. There was nothing more for him to say now; Blackie understood at last.

If Al's explanation of his sudden decision astonished Blackie, it produced reactions that were much more startling and complicated in little Grace. She was not only hurt because Al was hurt, but, for the first time, resentment flamed up in her toward Molly. How could Molly, who was able to put such a wealth of feeling into the rendering of a ballad, act in such an unfeeling way toward Al?

Grace's slim white fingers pressed hard against the sides of her cigarette tray until the skin went white. A sudden wave of passionate anger toward the other girl swept over her; she wanted to turn, rush into the main room, and upbraid Molly for her heartlessness. Keen-eyed Grace knew that Molly had left Al to go to the Marcus table. She knew Molly was trying to worm her way into the good graces of the producer.

Then the anger passed as quickly as it came, while an expression of tender sadness crossed Grace's face. She realized that these admissions of Al's meant that she could never mean anything to him, never have a chance to help him. They meant that he would pass out of her life completely, perhaps within a few moments. She felt tears welling up in her eyes, but she bravely fought them down.

By this time a plan was emerging

in Blackie's mind to aid his singing waiter. After all, Al was his friend as well as his star performer in the floor show, and he wanted to do him a good turn if he could.

"Why don't you read your song to Molly?" he suggested, with assumed carelessness.

"She won't listen," Al answered. "To her I'm only a waiter—a mug!" "Then why don't you sing it to her?" continued Blackie, springing his idea. "She's out there now—she'd have to listen."

Al shook his head. "I can't sing it. It's a love song—a ballad. You know I've never been able to sing the heart-throb stuff. That's not my line. I'm a comic."

"You haven't sounded so darn comic," Blackie countered quickly, "telling us all this. How do you know you can't sing a heart song? Have you ever tried it—I mean in public?"

"No, I've never tried one on the floor," Al admitted, "but I've tried rehearsing them and I was an awful flop."

"Yes, but don't you see, this is different. You wrote this song for Molly and you feel it. If you go out there and forget yourself, and sing it at her, you can make her feel it. Take a chance—they can't kill you. If the song goes over she'll understand for the first time how you really feel about her. Look what you stand to win!"

Al stared into the earnest eyes of Blackie, almost convinced. Could he do it, could he put the same feeling into his singing that had possessed him when he wrote the song. If he could he might be able to touch Molly's heart, as Blackie suggested.

Little Grace watched anxiously the play of expression on Al's face. She saw clearly what Blackie was driving at before Al saw it, and she hoped desperately that he could prevail on Al to try the song. If the words touched Molly's heart at least Al would be happy, which would make Grace happy.

"I'll do it," he said finally, with a gesture of decision. "I'll show her I'm something better than a waiter. I'll put everything I have into that song!"

Blackie wrung his hand. "Go to it, boy," he said enthusiastically. "You'd better make your entrance as soon as you can—while you're in the mood. Meanwhile, I'll see how the show's going."

When Blackie disappeared Grace also vanished down the corridor. But as Al came out into the main room a moment later he heard his name called. Grace slipped over to his side, looked up into his face with a forced, wistful smile and whispered:

"I'll be rooting for you, Al!"

"Will you, kid? Say, I appreciate it."

He raised his hand, patting her lightly on the cheek, as he would have caressed a sister. He noticed that her cheek was too warm, but he thought it was merely from excitement.

As he turned nervously away Grace raised her hand to her face, where his hand had rested for an all too brief moment. The spot was burning. She saw him move lightly across the room and approach the pianist to give him the new music. The pianist's mouth opened in astonishment at the idea of Al Stone, the comic, singing a heart song. Then Grace saw the man she loved heading for another woman. Would he put it over?

(To Be Continued.)

An Airplane's Buoyancy

A plane requires air to sustain it and on which the aeroplane propeller can "bit" in order to pull the plane along, and the entire air belt around the earth is as much a part of the earth and as much subject to the earth's gravitation as the oceans on the earth's surface. No plane could fly beyond the earth's gravitation area. A body ceases to feel the pull of the earth's gravity at a distance of about 215,000 miles from the moon. Here it would have no weight, the gravitation attraction of earth and moon being at that point equalized.

Brick Yard For Prince Albert

It is reported that the International Clay Products Company, of Estevan have purchased property in Prince Albert with the intention of making bricks there.

The Newest Discovery

American Chemical Society Told Gasoline Can Be Made From Trees

Gasoline made from trees is announced in a report to the American Chemical Society by Dr. Jacques C. Morrell and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions."

Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is wasted.

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

Short Strawed Crops Present Difficulties

the front end of lower elevator roller shaft to the gear otherwise the gear would unscrew from the roller shaft, as the strain is reversed on the threads. This may be done by drilling a hole into roller shaft and half into gear. Tap the hole, and screw in a bolt for a key. The lower end of the extension elevator is hinged on one bolt at each side to permit of flexibility in up and down motion. The extension elevator is suspended in proper position by means of a rod attached to a ball at the upper end. The rod extends from the hole to the platform frames behind the grain wheel.

It is an advantage to increase the speed of the canvas to insure more effective delivery of the grain. This is effected by wrapping the driving rollers with one thickness of narrow belting and by putting on a speed sprocket, which can be secured from the various machine companies. In order to brush the heads on to the platform canvas more effectively and keep the guards clear, the reel slats should be widened about three inches by nailing on them some flexible material such as linoleum or very heavy canvas. A more durable arrangement is to hinge another reel slat to each regular one by means of three narrow strips of belting. For windy weather a canvas hood may be attached over the upper end of the elevator.

Two ways of handling the cut grain are suggested. The one involving the least expense for equipment requires the use of ordinary wagon racks as receptacles for the cut grain, a wagon being drawn along the side of the converted binder. It will be necessary to make the bottom, sides and ends of the rack tight and it may be advisable to lower the side of the rack next the binder, so that the elevator may project well above it.

Two such racks would be necessary so that while one is unloading the grain at the stack the other would be in use with the binder. Stacks of headed grain are usually built rather narrow—10 or 12 feet—but may be as long and high as convenient. Spoilage in stacks is very infrequent unless a lot of green weeds are cut with the grain, provided of course that the grain is reasonably mature.

The other method of handling the cut grain calls for the use of what is known as a header-barge which has been in successful use for several years in sections of the province. The barge is a specially constructed portable form about seven feet square which moulds the stack as the grain pours into it from the binder. A man in the barge spreads the grain and tramps it, and when it is full and topped off, making a stack about eight feet high, the barge is tilted back and the grain is slid out. The stacks are left with perpendicular sides and tops that shed the rain. The grain cures well in these small stacks and produces a good grade.

There are three ways of threshing these stacks—first they may be arranged in groups so that the separator may be set among them; second they may be placed in rows and a portable thresher or combine moved from stack to stack, or third they may be arranged in rows and moved by means of a pull rake or other contrivance to a separator.

Those interested in building a barge may secure blueprints and specifications by writing to the Dept. of Agriculture, Edmonton.

Elevator extensions ready for attachment to the binder may be secured from a number of the farm machinery companies in the province.

Auction Sale

Acting on instructions from the Executors of the Estate of the late Mrs. Levi C. Snyder, I will sell by Public Auction the following furniture and equipment and 2 Residences, at the residence, 3 doors west of the Ev. Church, Didsbury, at 1:30 o'clock, on

SATURDAY, AUGUST 10th

DINING ROOM

Oak Buffet, Dining Room Table and 6 Chairs, 3 Rockers, 3 Small Tables, Upholstered Arm Chair, Secretary and Book Case.

KITCHEN

6-Hole McClary Range, 6 Kitchen Chairs, Sink, Kitchen Cabinet, Kitchen Table, Small Table, Medicine Chest, 8-Day Clock.

PARLOR

2 Rockers, Settee, Large Rug, Lot of Rugs, Small Table, **WILLIS PLAYER PIANO, Alexander style**, with 60 rolls.

BEDROOM

3 Dressers, 3 Washstands, Bedroom

Chair, Foot Stool, 1 Bedstead complete.

MISCELLANEOUS

Hall Rack, Rack, Desk, Linoleum 9x12, Movable Top Table, Small Coal Oil Heater, Fire Extinguisher, Cupboard, Lot of Pictures and Frames, Some Furs, Coats, Lot of Linoleum, Coal Oil Stove, Table Lamp, Trunk, Rocker, Couch, Curtains, Iona-Tone Health Belt, Garden Hose, Lawn Mower, Vase, Step Ladder, Gas Pump, Wheel Barrow, Maytag Power Washer, Kitchen Table, Wash Board, Chest 2 Chairs, 2 Wash Tubs, Homestead Stove, Lot of Dishes and Household Tools, Genuine Buffalo Robe (New), Block and Tackle.

Also the splendid brick Residence on Hespeler Street, and also that house now rented by Mr. Moon.

TERMS: Cash for Chattels; Terms can be arranged on Residences.

J. W. PHILLIPSON,

Auctioneer.

or the average farmer may construct this equipment himself at a very reasonable cost, and the necessary expense will be repaid many times over in the additional amount of grain saved by harvesting in this way.

A number of machines are being equipped for demonstration purposes and these will be located at various points in the province. These may be seen during the coming week at Vegreville, Vermilion, Sedgewick, Coronation, Camrose, Swallow, Stettler, and at the Provincial Government Farm at Oliver. Each of the machines will be in charge of a representative of

the Dept. of Agriculture who will be glad to assist farmers in the district in similarly adapting their binders to harvest short grain.

"There's a sort of bump on your chest," said the tailor, pausing in his measurements, "but we make the clothing so that you will not realize the bump is there."

"I know you will," sighed the customer. "That's my pocket book in my inside pocket."

"Contract awarded to the lowest bidder--"

WHEN a corporation wishes to build a factory—when a city constructs a new subway—when a large undertaking of that nature is planned, the first step is almost invariably a request for bids on the work. This practice of competitive bidding has saved millions of dollars. It assures the city or corporation of getting the best value for every dollar spent.

The same system can be applied to your own buying. And you can save a proportionate amount of money. How? Simply by consulting the advertising pages of this paper.

When you find yourself in need of a washing machine, a new furnace, a new hat, a pair of shoes, a new suit—anything, don't rush out and buy the first one offered you. Exercise the power of selection that the advertisements give you. Read about each one—what it will do, what it costs. Then, when you find the one that best suits your needs and pocketbook, buy it! In this way you'll be spending your money wisely. You'll know what you're getting and how much it costs—before you buy it.

Every advertisement is the bid of some merchant for your trade—consider them carefully before buying

The Great-West Canadian Folksong, Folkdance and Handicrafts Festival, to be held at Regina, March 20-23, will not be devoted entirely to the cultures of other than people of British origin, notwithstanding that eighteen different races will be represented. Here we have some of Jean Gauld's pupils in a Welsh Folk Dance. Scotch and English folk-songs and dances will also be interpreted, and the Irish, too.
